The 5 Safety Strengths:

To help you optimise your home's safety, we recommend that you pick the right safety strength depending on your home's unique safety needs. The higher the safety strength, the safer your home will be.

Safety Strength 1
Basic Safety

Godrej Safety Strength 1 locks come with the conventional mechanical locking system through basic security systems which have levers, wafers, tumblers and single-row pin-cylinder technologies.

Safety Strength 2
Ultra Safe Technology

Godrej Safety Strength 2 locks have highly precise computerised dimple keys with Advanced multi-row pin-cylinder technology. Here, the maximum number of combinations (key differs) that can be provided is up to 100 million, which makes each key unique and non-interchangeable with any other key.

Safety Strength 3
Extra Safe Technology (EXS)

Godrej Safety Strength 3 locks come with Advanced, Angular multi-row pin-cylinder technology. The maximum number of combinations (key differs) that can be provided is up to 2 billion and a highly complex system of master key solutions is possible.

Safety Strength 4
EVVA 3 Kurve System Technology (3KS)

The highest safety strength, Godrej EVVA, in mechanical locks, comes with a revolutionary EVVA 3 Kurve system technology (3KS) with a floating pin, sidebars and locking bar. This conforms to European standard EN 1303. The 30 trillion combination cycle means that a single key will not repeated for the next 30 trillion keys. Since there are not 30 trillion humans on the planet, it's virtually impossible for someone else to have an identical key as yours.

Safety Strength 5
Advanced Digital Access Control Technology

Godrej digital locks are based on hi-tech electronic systems which give you multiple access modes, like wearables, NFC, biometric, RFID card, etc., for convenience and enhanced safety.

*** Terms and Conditions apply as under:**

1. Standard visit charges shown are applicable for Godrej serviceable pin codes. For outside Godrej serviceable area, additional visit charges will be informed by service provider based on distance and time taken to travel and mode of transport.
2. Visit charges are applicable for under-warranty repair.
3. Installation charges given are for wooden doors and wooden frames only (Except floor spring).
4. Spares charges will be extra as applicable for out-of-warranty cases.
5. All charges mentioned above are exclusive of all taxes.
6. Emergency opening timings mentioned above are as per the time of call registration at helpline.
7. Warranty will be void if the installation is not carried out by a Godrej-authorised technician in a Godrej-serviceable area.
8. Any revisit required due to reasons such as the door or site not being ready, reconfiguration or demo of the lock, or society permission being denied at the scheduled time will be chargeable – Rs. 500 for digital locks and Rs. 200 for rim locks.
9. Removal of existing locks will incur an additional charge of Rs. 150.
10. Free installation does not include any carpentry work needed for fitting the lock. Such work, if required, must be arranged and paid for by the customer.
11. Installation services are available from Monday to Saturday, between 10 AM and 6 PM. For services requested post 6 PM or on Sundays, an additional charge of Rs. 200 will apply, subject to installer availability.
12. Free installation or repair under warranty will be provided in non-serviceable areas only for Digital Locks (Electronic Mortise). A charge of ₹4 per km will be applicable to the customer for the total round-trip distance from the ASP/ technician's location to the customer site.

Locks Maintenance Tips (Do's and Don'ts)

- Do not close the door/drawer/cabin when the bolt of the lock is extended/ locked.
- Paints and varnish should not be used over locks as it may enter the lock parts and affect the smooth functioning of the lock.
- For cleaning/ polishing of the lock, do not use any chemicals.
- Do not use any lubrication oil for smooth functioning of the lock. Only use WD-40 or kerosene for the same.
- Do not apply excessive force to key while opening the lock.
- Do not use the key as a screw driver or a can-opener as it may damage the key.
- Avoid exposure of the lock to rain.
- The aesthetic part of locks such as handles should be installed after the decor work of the door/home.
- Always get the Installation/Repair done through Helpline/Authorised service provider.
